

Dear Fellow Americans,

So many different grass-root groups are working hard and struggling in the defense of human rights and in the pursuit of democracy, unaware of each other's efforts, existence and the enormous amount of power we all possess collectively. To reach that goal we need to unify the existing groups and organize them under one umbrella. Only as a united democracy movement, we can force change to heal our society's ills. To achieve our goal we need to inform, unite, energize and organize our-selves into a massive grass-root democracy movement, a force not to be reckoned with.

We must come together, stay together united and form a citizen grass-root political action community, independent and free from any religion, political party and ideology. We, the people must never forget that without constant public political persistence, public participation and determination, there will never be any true change to bring about genuine democracy! We are the public and if we desire safe livable unpolluted environment, freedom, human rights and democracy, we must begin building now, and when we have achieved our goals, guard them vigilantly.

Please Complete This Form And Print Your Information Clearly
